

Dog or Fish?

Explore Pictographs

Pictographs are graphs that use pictures. Lining up pictures in a graph organizes information. After children have made graphs with objects, they can make graphs with pictures. Using pictographs prepares children for graphs they will encounter later in school—bar graphs and line graphs.

Look What We're Learning

Data Representation & Probability

- Represent data using pictures in a simple graph

Number & Operations

- Verbally count a set of 15 objects
- Compare sets of objects using more and fewer

Measurement & Time

- Compare length of two objects using long and short

Social-Emotional

- Work together to solve a problem
- Take turns
