

# Name That Number

## Identify Numerals

Children begin to count without understanding the meaning behind numbers. After they learn that numbers represent quantities, they learn to associate quantities with written symbols (numerals). They learn how the symbols look and how they are positioned on a page.

## Look What We're Learning

### Number & Operations

- Identify written numerals and position correctly
- Verbally count a set of 10 objects
- Recognize the last number said is the total
- Make or draw a set of objects to match a given number

### Social-Emotional

- Cooperate with other children
- Take turns with peers
